Professional Summary

Senior Android Developer with expertise in native Android development. Passionate about building innovative mobile apps that enhance user experience and drive business growth.

Professional Experience

- Mobile Team Leader at **Alakmalak Technologies** (June 2018 - Present)
- Sr. Android Developer at **Variance Infotech Pvt. Ltd.** (May 2016 - June 2018)

Skills & Expertise

- **Android Development:** Over 8 years of experience in designing and developing Android applications with a focus on native Android development.
- **Programming Languages:** Proficient in Java and Kotlin, with strong skills in object-oriented design, data structures, problem-solving, and debugging.
- **Android Tools & Frameworks:** Experienced with Android SDK, Android Studio, SQLite database, and core components like Services and Broadcast Receivers.
- **Cross-Platform Development:** Adaptable with technologies such as React Native, React JS, Ionic, and basic Python scripting.
- **Payment Gateway Integration:** Skilled in integrating payment systems like PayPal (Braintree), Stripe, ExpressPay, and Authorize.Net.
- **Google & Firebase Services:** Extensive knowledge of Firebase (Crashlytics, Database, Storage, Analytics, Notifications) and Google services (Maps, YouTube API, AdMob, Google Fit).
- **Social Media Integration:** Proficient in integrating social platforms, including Google, Facebook, Twitter, and handling Facebook login, data retrieval, and ads.
- **Communication Protocols:** Experienced with chat protocols like XMPP, Socket.IO (React Native), MQTT, and Bluetooth/WiFi communication.
- **API Integration:** Skilled in integrating REST and SOAP APIs for seamless data exchange.
- **User Interface Design:** Well-versed in Material Design principles for creating intuitive and visually appealing user interfaces.
- **Image Recognition & Wearables:** Knowledgeable in image recognition with TensorFlow, integrating Samsung Fit, and developing Wear applications.
- **App Deployment:** Experienced in deploying applications to the Play Store, Amazon Store, and Samsung Store.
- **Code Quality & Security:** Known for writing efficient, maintainable, and reusable code with a strong emphasis on privacy and security.
- **iOS Development:** Competent in fixing bugs in iOS applications and updating the Apple Store with necessary fixes.
- **Troubleshooting:** Adept at diagnosing and resolving issues across various technologies and platforms.

Showcase of Major Projects

- **LoyaltyApp:** Developed a customer loyalty application for an HP petrol pump client to reward loyal customers. The app was built using Java, and an admin panel was created with HTML and JavaScript.
- **Appreciate App:** A stock market application allowing users to buy and sell foreign stocks and set future goals. [Appreciate on Google Play](#)
- **Personality Test:** A React Native website designed to assess user personalities based on their responses. [Personality Test](#)
- **Stocks:** An application providing local stock details and trading capabilities using MQTT and React Native.
- **Student Portal:** A React Native application for managing student events, featuring chat functionality via Socket.IO.
- **Eskiva:** A crime reporting application with a native Kotlin front end that displays crimes on an OSM map and includes SOS and notification features. [Eskiva on Google Play](#)
- **RentalApp:** A React Native application for managing rental properties, available on Android and iOS, with a web version created using React Native Web.
- **TotalFix:** A native Kotlin Android app for appointing professionals. [TotalFix on Google Play](#)
- **WearCall:** A Wear OS application enabling users to make calls via speech commands to specific contacts.
- **Xylem:** An application for Bluetooth hardware communication to retrieve water pump details. [Xylem on Google Play](#)
- **LEADMASTER CRM:** A CRM application for managing leads and campaigns. [LEADMASTER CRM on Google Play](#)
- **CRMTiger:** A mobile app providing access to vTiger CRM's community edition, developed for a leading vTiger solutions provider. [CRMTiger on Google Play](#)
- **OBD Product:** An app for retrieving car details from an OBD device via Bluetooth pairing.
- **BaasApp:** A live tracking application for school buses, used by teachers, parents, and bus drivers.

Education

- MCA, Gujarat Technological University, 2016 (CPI: 8.36)
- BCA, Hemchandracharya North Gujarat University, 2014 (CPI: 8.64)
- 12th Grade, Gujarat Secondary & Higher Secondary Education Board, 2011 (Score: 68%)
- 10th Grade, Gujarat Secondary Education Board, 2009 (Score: 70.92%)

Personal Attributes

- Committed to excellence with dedication, discipline, and a positive, proactive mindset that fosters collaboration and productivity.
